48. (New) The liquid crystal display as claimed in claim 47 wherein said liquid crystal display panel comprises a first transparent substrate, a second transparent substrate, liquid crystal material positioned between said first and second transparent substrates, a first transparent electrode positioned between said liquid crystal material and said first transparent substrate, and a second transparent electrode positioned between said liquid crystal material and said second transparent substrate.

49. (New) The liquid crystal display as claimed in claim 48 wherein said first transparent plate is a glass plate.

50. (New) The liquid crystal display as claimed in claim 48 wherein said indium tin oxide layer is positioned behind said first transparent plate and in front of said liquid crystal display panel.

51. (New) The liquid crystal display as claimed in claim 48 wherein said front and rear polarizers are orthogonal to one another.

52. (New) A liquid crystal display comprising:

- (a) a liquid crystal display panel;
- (b) a touch panel positioned in front of said liquid crystal display panel;
- (c) a rear polarizer positioned behind said liquid crystal display panel; and
- (d) a front polarizer positioned in front of said touch panel.

53. (New) The liquid crystal display as claimed in claim 52 wherein said liquid crystal display panel comprises a first transparent substrate, a second transparent substrate, liquid crystal material positioned between said first and second transparent substrates, a first transparent electrode positioned between said liquid crystal material and said first transparent substrate, and a second

b' Canceled

transparent electrode positioned between said liquid crystal material and said second transparent substrate.

54. (New) The liquid crystal display as claimed in claim 53 wherein said front and rear polarizers are orthogonal to one another.

REMARKS

No claims have been canceled or amended. Claims 47-54 have been amended. Therefore, claims 1-54 are under active consideration.
